GitHub | Portfolio | LinkedIn

May 2027 internships | Acquisitions, Asset Management, Capital Markets | Open across India

EDUCATION

Vellore Institute of Technology, Vellore - B.Tech, Mechanical Engineering

2024-2028 (expected) | CGPA: 8.86/10

EXPERIENCE

Alvionx - Fintech Intern | Sep 2026-Present

- Journaled 172 completed trades across backtesting work; documented liquidation-based ETH/BTC signals, entries, exits and trade rationale.
- Backtested Reliance price triggers: invest 10% of remaining cash per 5% decline from the last buy; exit 5% above weighted-average cost.
- Applied EMA, candlestick and price-action exit rules with a 1:2 target risk-to-reward; documented trade rationale without claiming realised returns.

LearnTube.ai - Data Analytics Intern | Oct 2025-Jan 2026

- Developed forecasting and data-validation workflows using stationarity tests, seasonal decomposition, error comparisons and checks for missing values, duplicates and outliers.

SELECTED PROJECTS

Bengaluru Office Acquisition Underwriting | Python | Code

- Modelled five-year property cash flows, lease rollover, amortising debt and DCF valuation using explicitly illustrative acquisition assumptions.
- Evaluated three scenarios, 25 sensitivity combinations and 2,000 stress simulations; documented investment findings and 10 automated tests.

Embassy REIT / Manyata Investment Case | Excel | Memo & Model

- Reconciled reported NAV, units and debt; built a 10-year acquisition model from public disclosures and labelled lease/financing assumptions.
- Evaluated three scenarios and native sensitivity tables; base case returned 7.7% illustrative levered IRR. Desktop Excel verification pending.

Opti-Workbench - Portfolio Optimisation Research | Python, CVXPY | Code

- Implemented empirical-CVaR convex seeding and PSO/GA refinement for constrained allocation; evaluated synthetic universes with feasibility and risk diagnostics.
- Examined cardinality through subset enumeration and shortlist screening; distinguished convex-seed results from the full heuristic objective.

SKILLS

Investment analysis: Property cash flows, DCF/NPV, debt schedules, DSCR, scenario analysis, portfolio risk.

Data: Python, pandas, NumPy, SQL, Excel, Power BI, scikit-learn, statsmodels, Git/GitHub.
