SCAN PORTFOLIO

May 2027 internships | Acquisitions, Asset Management, Capital Markets | Across India

EDUCATION

Vellore Institute of Technology (VIT), Vellore *2024–2028 (Expected)*

B.Tech in Mechanical Engineering, CGPA: **8.86 / 10**

EXPERIENCE

Alvionx *Sep 2026–Present*

Fintech Intern

- Journaled **172 completed trades** across backtesting work; documented liquidation-based ETH/BTC signals, entries, exits and trade rationale.
- Backtested Reliance price triggers: invest **10% of remaining cash** per 5% decline from the last buy; exit 5% above weighted-average cost.
- Applied EMA, candlestick and price-action exit rules with a **1:2 target risk-to-reward**; documented trade rationale without claiming realised returns.

LearnTube.ai *Oct 2025–Jan 2026*

Data Analytics Intern

- Developed forecasting and data-validation workflows using stationarity tests, seasonal decomposition, error comparisons and checks for missing values, duplicates and outliers.

PROJECTS

Embassy REIT / Manyata Investment Case *GitHub / evidence*

Excel | Public filings and labelled assumptions

- Reconciled reported NAV, units and debt; built a **10-year acquisition case** with cash flows, amortising debt, DSCR and three scenarios.
- Documented **7.7% illustrative levered IRR** and valuation risks in an investment memo; independently checked outputs. Desktop Excel verification pending.

Property Operating Monitor *GitHub / evidence*

Python, SQLite | Synthetic portfolio

- Built a SQL-backed operating review for **4 assets, 20 leases and 24 asset-months**; calculated occupancy, rent-weighted WALE, tenant concentration and DSCR.
- Reconciled budget-to-actual NOI through occupancy, rent, collections and expense effects; added **11 tests** and flagged lease/operating-data mismatches.

Bengaluru Office Acquisition Underwriting *GitHub / evidence*

Python | Illustrative acquisition assumptions

- Modelled five-year property cash flows, lease rollover, debt and DCF valuation; evaluated **3 scenarios, 25 sensitivities and 2,000 stress simulations**.
- Tested model identities and economic direction with **10 automated tests**; documented the price required to meet the assumed investment hurdle.

SKILLS

Investment: DCF/NPV, cash-flow modelling, debt schedules, DSCR, lease analysis, scenario analysis.

Tools: Python, pandas, NumPy, SQL, Excel, Power BI, scikit-learn, statsmodels, Git/GitHub.
